General Consent for Care and Treatment Consent

TO THE PATIENT: You have the right, as a patient, to be informed about your condition and the recommended surgical, medical or diagnostic procedure to be used so that you may make the decision whether or not to undergo any suggested treatment or procedure after knowing the risks and hazards involved. At this point in your care, no specific treatment plan has been recommended. This consent form is simply an effort to obtain your permission to perform the evaluation necessary to identify the appropriate treatment and/or procedure for any identified condition(s).

This consent provides us with your permission to perform reasonable and necessary medical examinations, testing and treatment. By signing below, you are indicating that (1) you intend that this consent is continuing in nature even after a specific diagnosis has been made and treatment recommended; and (2) you consent to treatment in your home or any satellite location where Dr. Mitchell is able to render services. The consent will remain fully effective until it is revoked in writing. You have the right at any time to discontinue services.

You have the right to discuss the treatment plan with your physician about the purpose, potential risks and benefits of any test ordered for you. If you have any concerns regarding any test or treatment recommend by your health care provider, I encourage you to ask questions.

I voluntarily request a physician to perform reasonable and necessary medical examination, testing and treatment for the condition which has brought me to seek care at this practice.

I understand that if additional testing, invasive or interventional procedures are recommended, I will be asked to read and sign additional consent forms prior to the test(s) or procedure(s). I certify that I have read and fully understand the above statements and consent fully and voluntarily to its contents.

ROUTINE ASSESSMENT OF PATIENT INDEX DATA

The RAPID3 includes a subset of core variables found in the Multi-dimensional HAQ (MD-HAQ). Page 1 of the MD-HAQ, shown here, includes an assessment of physical function (section 1), a patient global assessment (PGA) for pain (section 2), and a PGA for global health (section 3). RAPID3 scores are quickly tallied by adding subsets of the MD-HAQ as follows:

ELECTRONIC COMMUNICATION CONSENT

Electronic communication such as email offers an easy and convenient way for patients and doctors to communicate. However

please carefully review below

E-mail is never, ever, appropriate for urgent or emergency problems! Please use the telephone or go to the Emergency Department for emergencies.

E-mail is great for asking those little questions that don't require a lot of discussion. Appropriate uses of e-mail also include prescription refill requests, referral and appointment scheduling requests and billing/insurance questions.

E-mails should not be used to communicate sensitive medical information, such as information regarding sexually transmitted diseases, AIDS/HIV, mental health, developmental disability, or substance abuse. You may request labs be sent by email. E-mail is not confidential. It is like sending a postcard through the mail. Our staff may read your e-mails to handle routine, nonclinical matters. You should also know that if sending e-mails from work, your employer has a legal right to read your e-mail.

E-mail may become a part of the medical record when we use it; a copy may be printed and put in your chart.

E-mail is not a substitute for seeing us. If you think that you might need to be seen, please call and book an appointment!

E-mails may be forwarded to our staff for handling, if appropriate. Finally, either one of us can revoke permission to use e-mail electronic communications at any time, which will impact future and not past communications.

I have read the above ir	nformation and understand the limitations of security on information transmitted.

Crowd sourcing of diagnostic principle, clinical findings, and education.

I'm very passionate about what I do as well as educating colleagues and the community using various platforms.

At times I will share snippets of cases including documentation, pictures of swollen joints, rashes, labs, imaging findings *WITHOUT PATIENT IDENTIFIERS*.

If you are comfortable with me using your case in this manner please sign below. Your help in ongoing education is appreciated.
